We are thrilled to announce our fall hospital supplier diversity conference, **Building Bridges: Advancing Supplier Diversity in Health Care**, on **September 26, 2024**, in Montebello, CA!

As advocates for diversity and inclusivity, we believe that by building bridges across industries, hospital procurement, and supply chain professionals, diverse suppliers and economic development organizations can come together to explore opportunities for partnership, share best practices, and collectively advance the cause of diversity and inclusion in health care procurement.

Throughout the conference, attendees can expect to:

- Engage in panel discussions led by industry experts on topics such as supplier diversity initiatives, overcoming challenges in procurement, and fostering sustainable partnerships.
- Participate in interactive workshops designed to equip attendees with practical strategies for enhancing supplier diversity within their organizations.
- Network with peers, potential partners, and industry leaders to exchange ideas and forge meaningful connections.

Interested in learning more about our 2024 supplier diversity conference? Feel free to reach out to Iliana Covarrubias at icovarrubias@hasc.org!
