Cost savings on system-owned populations

The problem: Health Systems do not have control

Formulary Control

— CAN YOU CONTROL? —> What is on your formulary?

Utilization Control

— CAN YOU CONTROL? —> What prior authorizations are approved?

Network Control

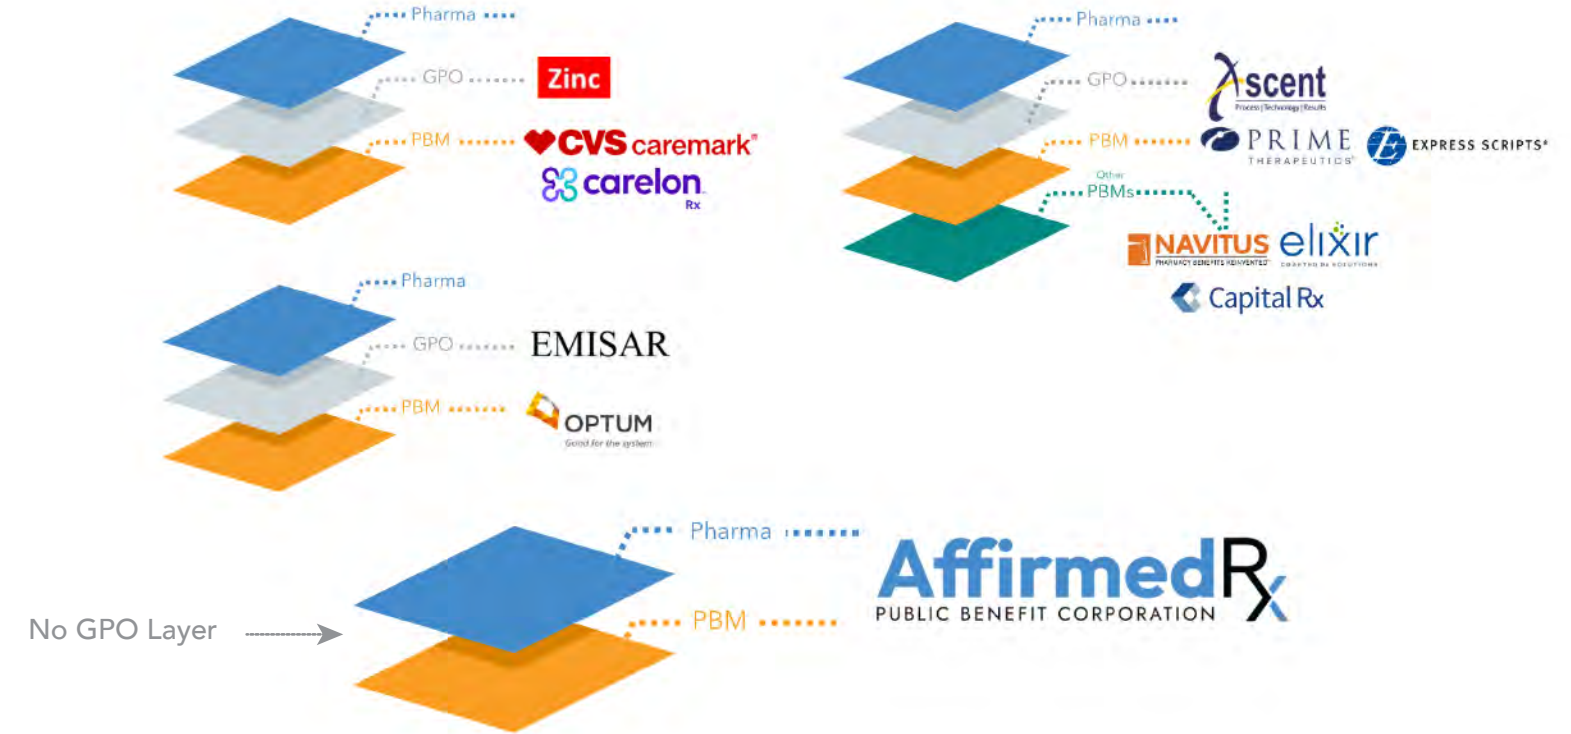

— CAN YOU CONTROL? —> The pharmacies in your network?

Pass-Through Control

— CAN YOU CONTROL? —> Cost of goods and dispensing channels?

AffirmedRx Removes the Unnecessary GPO Layer

Managing hospital programs has never been more challenging. We're here to reinvent the way you think about and provide pharmacy benefits.
