

Glytec Command Center

See clearly. Act decisively.

Clarity That Drives Action for Health System Leaders

Designed for enterprise leadership, making it possible to detect risk early, align priorities, and drive measurable impact across the organization.

In today's volatile healthcare landscape, executives need more than fragmented data. They need *executive-ready clarity* — powered by live insights and AI — to make the right call, at the right time.

**Designed for Executives.
Built with Clinicians.
Backed by AI.**

Command Center is reimagining clinical data to resonate directly with hospital system CEOs, CMOs, and CFOs. It translates EMR and glycemic data into immediate, prioritized intelligence that informs:

System-Wide Risk Surveillance

- Identify high-risk patients and discharge patterns instantly
- AI query: “Show me the 5 highest-risk discharges today.”
- Enables early interventions to avoid ICU escalations

Segment-Level Performance Transparency

- Benchmark units, shifts, and hospitals
- AI query: “Which units are driving most readmissions this quarter?”
- Detect underperformance and guide resource optimization

CMS eCQM Readiness and Optimization

- Track hypo-/hyperglycemia performance vs. CMS benchmarks
- AI insights on where ratings may be vulnerable and how to improve
- Actionable guidance to enhance compliance before penalties hit

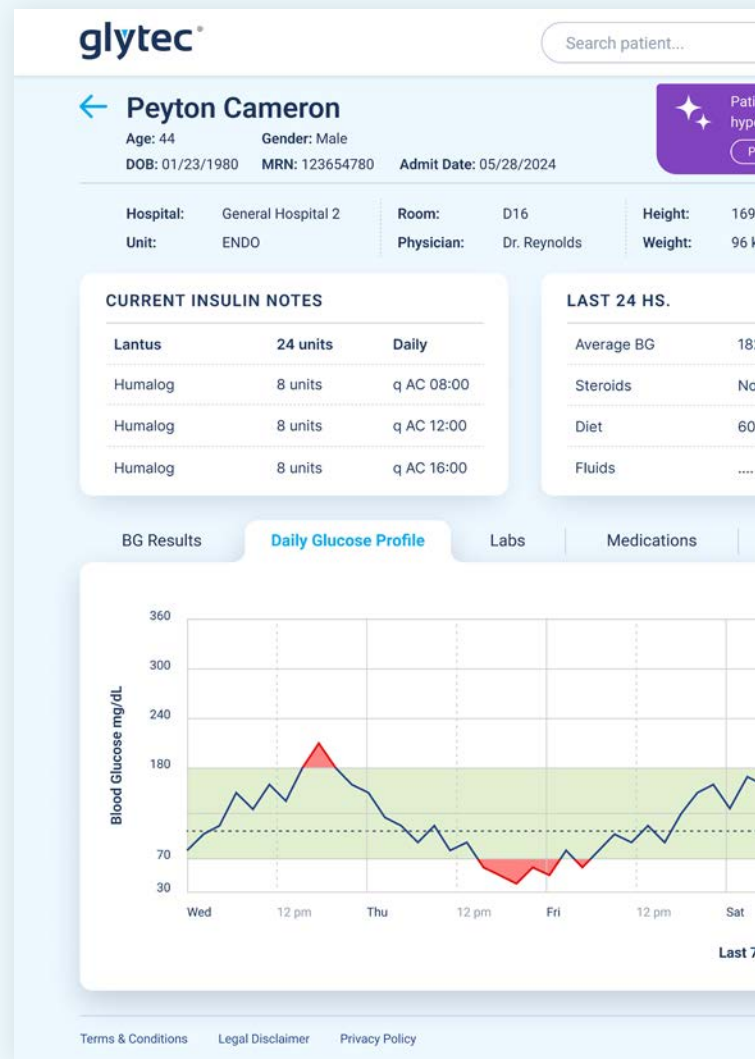

ROI You Can Measure

Financial Return

- \$12K+ per readmission prevented
- \$2.5K–\$4K per ICU stay avoided
- \$3K+ per severe hypoglycemia event averted
- 20–30% reduction in glucose testing costs
(Source: CMS, Becker's, Glytec internal data)

Operational Lift

- 5–20 minutes saved per nurse per shift
- Lower clinical burnout and higher staff satisfaction
- Faster, safer discharges = more patients out by noon
- Fewer missed consults, fewer ICU escalations

CIO Perspective

A Platform Built to Scale — Fast

- **Day 1 Value:** Out-of-the-box insights with minimal ramp-up
- **Limited IT Lift:** Light integration, built for simplicity
- **Enterprise Ready in 90 Days:** Designed for quick implementation, massive impact

Whether you're a clinical leader managing performance or an executive preparing for board reporting, Command Center equips you to lead with confidence and precision.

Let's Get Started — No Cost, No Commitment

Gain insight today with a complimentary glycemic risk assessment. It's the first step to unlocking clarity across your enterprise.
