Certificate in Healthcare Project Management

HASC COHORT BEGINS MARCH 24

OVERVIEW

Learn the essentials of project management and how they apply specifically to healthcare in a special cohort for HASC members. The eight-week program presents high-level project management concepts and key leadership skills for success. Learners will study the healthcare project scope, strategies for effective communication and how influencing organizational change plays into project success.

In a rapidly changing industry, empower any healthcare professional to drive change in their unit, department and company with the Certificate in Healthcare Project Management, co-developed by OpusVi and American University.

PROGRAM HIGHLIGHTS

- Learn practical, relevant tools and strategies to navigate health care projects
- Build your confidence to manage any project from start to finish
- Fits perfectly into your busy schedule: 8 weeks, with four to five hours of study weekly
- Access to thought leadership pieces from health care professionals
- Earn a certificate from American University, 16 CEUs and badges
- Claim up to 40 PDUs from the Project Management Institute
