

Fill Your Health Care and IT Roles with Custom-trained Staff

Need to fill health care and IT positions in the next three to six months? Learn how MedCerts online certification programs can help you hire qualified candidates and upskill current employees.

HASC is pleased to partner with MedCerts, a leader in online health care and IT certification training, to offer a wide range of programs. MedCerts's multi-faceted approach lowers entry barriers for two- and four-year universities, tailors student training to the specific skills you're looking for in employees, and helps you effectively fill workforce vacancies.

The programs can help meet training needs in these areas and more:

- Cloud Technology Professional
- Cybersecurity Analyst
- EKG Technician
- Electronic Health Records Specialist
- Information Systems Security Professional
- IT Helpdesk Administrator
- IT Security and Network Technician
- IT Support Professional
- Medical Assistant
- Medical Coding and Billing Professional
- Medical Front Office Assistant and Administration Specialist
- Medical Laboratory Assistant
- Medication Care Coordinator
- Patient Care Technician
- Pharmacy Technician Specialist
- Phlebotomy Technician
- Sterile Processing Technician
- Surgical Technologist

Costs vary per program and include exam fees, books, materials and personal advisors.

Some states and regions have additional requirements for individuals enrolling in a MedCerts program. Please contact us to ensure your eligibility for enrollment.
